## Splošni opis:

The purpose of the angled patch panel cover is to optimize management of the air flow inside the cabinet, and also provide a protection from dust penetration in the patch panel.

## Značilnosti izdelka:

- Fits both angled 24 and 48 connectors angled patch panel.

## Prednosti uporabe:

- The presence of the cover prevents hot air from behind the cabinet to mix with cooler air from the front, thus maximizing the air cooling system in place in the data center.
